THE SOLUTION

# A Seamless Bridge Between SAP and Your Storage

The ZMCAPPS Archiving Connector Service integrates directly with the standard archiving tools already built into the SAP Integration Suite — enabling effortless offload to your chosen storage environment.

## 01 SAP Extracts Data

Suite handles all data extraction, pushing, and state management using native built-in tools.

## 02 ZMCAPPS Connects

Translates SAP's internal archiving actions into verified deliveries to external servers.

## 03 Data Arrives Safely

SAP maintains lifecycle tracking while ZMCAPPS ensures integrity at the destination.

BRING YOUR OWN STORAGE (BYOS)

ZMC APPS

Point archives at the infrastructure you already own.

### Object Storage

S3-Compatible Buckets

### Secure File Transfer

SFTP · FTP  
FTPS Servers

### Web Infra.

HTTP / Web Endpoints

#### THE BOTTOM LINE

## 50% to 90% Cost Savings

— Starting Immediately

Most organizations see an immediate and dramatic reduction in storage overhead by moving message processing log archives from premium tiers to existing file infrastructure. Savings begin from the very first archiving cycle.

#### Eliminate recurring high-tier costs

Move archives off premium cloud permanently

#### No new vendor commitments

Reuse your existing storage infrastructure

#### Immediate ROI

Savings begin from the first archiving cycle

#### Scales with your data volume

Grows with your needs, never against your budget
